

Johnson Matthey

International Seminar

Brazing of Tungsten Carbide and PCD-tipped Tungsten Carbide

Guest Speakers to be Confirmed

Seminar Dates : 24-25th April 2013

Who Should Attend?

The seminar is aimed at production engineers, production managers, technical and product development personnel.

There will be the opportunity to book a brazing consultation to discuss specific technical issues in private with the speakers outside of the seminar sessions.

European language speakers will be available to assist with these consultations if necessary.

Outline Programme

- The fundamentals of brazing technology.
- An introduction to cemented tungsten carbide and PCD-tipped tungsten carbide.
- Brazing filler materials and fluxes.
- A survey of modern heating methods.
- The theory and practice of brazing tungsten carbide and tungsten carbide tipped with PCD.
- Process analysis.
- Future developments in this field.
